## Education

### Stevens Institute of Technology

Hoboken, NJ

Master of Computer Science — GPA-3.78/4

Expected May 2026

Coursework: Algorithms, Concurrent Programming, Web Programming, Enterprise software Architecture

### NMIMS, Mukesh Patel School of Technology Management and Engineering

Mumbai, India

Bachelor of Technology in Information Technology — GPA-3.4/4

June 2018 - May 2022

Coursework: Data Structures and Algorithms, Operating Systems, Data Warehousing and Mining, Software Engineering, Artificial Intelligence, Database, Networking, Cloud Computing

## Work Experience

### Lentra

Pune, India

Senior Software Engineer (Full-time)

May 2022 - November 2023

- Designed and implemented middlewares using Java, Spring Boot to optimize the orchestration layer of the microservice architecture, reducing API response times by 25% and facilitating the seamless migration of services to AWS
- Integrated bank statement analyzers and implemented credit eligibility calculations using Python to automate data entry, reducing loan processing time by 2 days
- Revitalized unit test case infrastructure using JUnit by addressing legacy errors and introduced 40+ new test cases elevating success rate from 65% to 100% and code coverage from 46% to 85%
- Created a JavaScript-based solution to generate daily loan application status reports and implemented a CRON job for automated FTP uploads, saving 4 hours of manual effort weekly
- Ensured the on-time delivery of two projects by leading deployment and launch efforts, earning 'The Spot Award' for exceptional contributions to client success in Q2 2023

### Blitz Jobs

Mumbai, India

Android Development Intern (Full-time)

May 2021 - June 2021

- Led the design and development of a user-friendly Android app to digitize the rooftop solar process, increasing sales partner engagement by 30% after launch
- Contributed to a 10% increase in sales through improved efficiency and strengthened client interactions, gaining significant adoption among company sales partners
- Introduced analytics features to provide actionable insights into partner performance and customer preferences

### Krux Works

Mumbai, India

Web Development Intern (Full-time)

September 2020 - October 2020

- Engineered a comprehensive web platform with dashboards to improve user access and streamline information management for the company's product suite
- Revitalized community interaction by introducing a WordPress forum, which attracted 500 users in the first week and generated an average of 75 new posts daily
- Improved mobile usability by over 30% through the development of responsive design solutions, enhancing the user experience across different devices

## Skills

**Languages:** Java, Python, C, C++, JavaScript, HTML, Groovy

**Tools:** VS Code, Android Studio, Jira, Bitbucket, Postman, GIT, Flutter, Figma, Redis, Maven, Docker, GraphQL, Redis

**Frameworks:** SpringBoot, Mockito, Flask, NodeJs, ReactJs, Hibernate, Bootstrap

**Database & Cloud Services:** MongoDB, SQL, Firebase, AWS, Google Cloud Platform

**Courses:** Python for Computer Vision, Flutter Development Bootcamp, AWS Technical Essentials

## Projects

Ride Share | *Node.js, JavaScript, Handlebars, MongoDB*

GitHub

- Developed a Ride-Share Application using Node.js and Express.js, facilitating 500+ simulated ride requests and enabling real-time matching between users and drivers

Voice Commerce | *Python, Flask, HTML, CSS*

GitHub

- Built a Flask-based voice-enabled e-commerce platform that empowered street vendors to list and sell products online, leveraging Google Cloud's Speech-to-Text API to enable multilingual voice input, improving accessibility and reducing onboarding time by 50%
